

	Full Name	Jane E. Freedman		
	Affiliation	University of Massachusetts Medical School		
	Position & Title	Budnitz Professor of Cardiovascular Medicine Director of Cardiovascular Research		
EDUCATION & PROFESSIONAL EXPERIENCE				
Institution/Location	Degree (if applicable)	Completion Date (MM/YYYY)	Field of Study	
Yale University	BA	5/1984	Architecture	
Tufts University	MD	5/1989	Medicine	
Mass General Hospital/Harvard		7/1991	Internal Medicine	
Brigham and Womens Hospital/Harvard		7/1995	Cardiology	
PERSONAL STATEMENT (AREAS OF RESEARCH INTERESTS)				
Edward Budnitz Professor of Cardiovascular Medicine at University of Massachusetts Medical School, Director of Cardiovascular Research. Dr. Freedman's research examines the regulation of pathways contributing to atherothrombotic and cardiometabolic disease. She oversees two research programs; the first is a basic science laboratory that examines the role of immunity, infection, and inflammation on atherothrombotic disease. The second facility uses high-throughput, nano-chip, and RNA-seq technologies to study gene expression and provide large scale transcriptomic and proteomic translational data for a wide range of clinical and basic projects. She is the Editor-in-Chief of Circulation Research.				
POSITION & HONORS				
Circulation	Associate and Senior Editor			
Circulation Research	Editor in Chief			
Director	High-throughput biomarker core laboratory			
CONFLICT OF INTEREST AND FINANCIAL DISCLOSURE
